**Levee Repairs to Close One Lane on Charles Page Blvd West of S 65<sup>th</sup> W. Ave.**

The contractor working on updates to a portion of the Tulsa-West Tulsa Levee System will be closing the southern-most lane of Charles Page Blvd west of S. 65<sup>th</sup> W. Ave to west of Bigheart Creek beginning Friday, June 5, 2020.

This Army Corps of Engineers project will address the 70-year-old concrete structure that experienced severe seepage during last year's flooding. Repairs will include resealing the joints and other needed maintenance.

The contractor expects to reduce the area of Charles Page Blvd. shown in the map below from 4 to 3 lanes in phases over the next 7 weeks to allow for construction.
