TULSA COUNTY

PURCHASING DEPARTMENT

DATE:	March 12, 2019
FROM:	Matney M. Ellis Purchasing Director
TO:	Board of County Commissioners
SUBJECT:	Addendum 1 – Election Board Storage Building

On February 11, 2019, the Notice to Bidders was mailed for the Election Board Storage Building. This bid is set to open on the 25th day of March, with bids to be received by the County Clerk's Office until March 22nd, 2019 at 4:00pm CST.

MEMO

This addendum serves to provide:

- Answers to vendor submitted requests for information;
- Changes and clarifications to specifications and drawings; and
- Agenda and Sign-in sheet for the March 4th pre-bid meeting.

This addendum is respectfully submitted for your approval.

MME / mlb

ORIGINAL: Michael Willis, County Clerk, for the March 18, 2019 agenda.

Matney M. Ellis Purchasing Director

March 18, 2019

Board of County Commissioners Tulsa County Administration Building Tulsa, Oklahoma 74103

On February 11, 2019, the Notice to Bidders was mailed for the <u>Election Board Storage Building</u>. This bid is set to open on the 25th day of March, with bids to be received by the County Clerk's Office until March 22nd, 2019 at 4:00pm CST.

This letter is to serve as notice that Addendum 1 has been issued for this solicitation. This addendum serves to provide:

- Answers to vendor submitted requests for information;
- · Changes and clarifications to specifications and drawings; and
- Agenda and Sign-in sheet for the March 4th pre-bid meeting.

Addendum 1 is available for review and/or download at the following:

- Tulsa County Purchasing Department
- <u>http://www.tulsacounty.org/purchasingvendors</u>

Respectfully Yours,

4/2

Matney M. Ellis Purchasing Director

ADDENDUM NO. 1 Tulsa County Election Board Storage Building BKL, Inc. - Project #735

March 18, 2019

NOTICE TO BIDDERS

This Addendum is issued to all registered plan holders pursuant to the Instructions to Bidders and Conditions of the Contract. This Addendum serves to clarify, revise, and supersede information in the Project Manual, Drawings, and previously issued Addenda. Portions of the Addendum affecting the Contract Documents will be incorporated into the Contract by enumeration of the Addendum in the Owner/Contractor Agreement. The date for receipt of bids is unchanged by this Addendum and is at same time and location. The Bidder shall acknowledge receipt of this Addendum in the appropriate space on the Bid Form.

CHANGES/CLARIFICATIONS TO SPECIFICATIONS

- 1. SPECIFICATION 133419 METAL BUILDING SYSTEMS, Paragraph 2.1, Manufacturers:
 - Red Dot Buildings are approved as a manufacturer of metal buildings.
 - Pinnacle Structures are approved as a manufacturer of metal buildings.

2. SPECIFICATION 133419 METAL BUILDING SYSTEMS

- **Revise** Section 2.2 Paragraph B.2.a as follows:
 - a. Wind Loads shall be in accordance with ASCE 7-10, Exposure B, Risk Category III II and a wind velocity of 120 **115** MPH.

CHANGES/CLARIFICATIONS TO DRAWINGS

- 1. SHEET C-2, Add Silt Fence along west, south and east boundary of construction area.
- 2. SHEET C-2, Add Note 4 as follows:

"4) Contractor shall be responsible for damage to all structures, landscaping, paving, and any other items located within and outside the work area. Any damage to permanent items incurred by the contractor shall be repaired to original condition, by the contractor, at his own expense."

3. SHEET A-4, Add Note near top of Wall Sections as follows:

"R-19 Vinyl Faced Insulation at Roof."

- 4. SHEET A-5, At Details 1, 2, 4, 5 Revise R-19 Vinyl-faced Insulation to be R-13.
- 5. SHEET S-1, Revise Design Data Notes as follows:
 - 1. Roof Live Loads 20 Psf Ibc (2015)
 - 2. Floor Live Loads 100 Psf
 - 3. Ground Snow Load 10 Psf Ibc (2015)
 - 4. Risk Category II
 - 5. Wind Load IBC (2015)
 - A. Ultimate Design Wind Speed V = 115mph
 - B. Nominal Design Wind Speed V = 89 Mph
 - C. Exposure Category C-B
 - 6. Seismic: Site Class C
 - Design Category B- A
 - 7. Soil Allowable Bearing 2500 Psf In Engineered Fill
 - And Native Soil
 - 8. Structural Concrete: F'c=4000 Psf Slab & Footings
- 6. SHEET S-1, Slab Plan:
 - Revise Fin. Fl. Elev. 730.00 to be 730.80.

ADDITIONAL QUESTIONS/RESPONSES

QUESTION: Could you please tell me what the estimated cost range for the above project is? RESPONSE: See attached Architect's estimate.

QUESTION: As per 133419 Section 2.2 Performance Requirements we are to follow the following design criteria:

Exposure B IBC 2015 Risk Category III Wind Speed 120 mph Auxiliary Load of 5 psf for fire protection systems, ceilings, and mechanical units Purlins and Rafters: Vertical Deflection L/240 Girts: Horizontal Deflection L/240 Metal Roof Panels: Vertical Deflection L/240 Metal Wall Panels: Horizontal Deflection L/240 Lateral Drift: L/200

As per the construction drawings we are to follow the following design data and information: Exposure C (Sheet S-1 Design Data) IBC 2015 Risk Category II (Sheet S-1 Design Data) Wind Speed 115 mph (Sheet S-1 Design Data)

The building loads specified per 133419 2.2 are more stringent than typically used given the building description per Sheet A-1 (Building Description), (A NON-SPRINKLED PRE-ENGINEERED METAL BUILDING USED AS STORAGE FOR ELECTION EQUIPMENT AND RECORDS. NO FLAMMABLE LIQUIDS, NO VEHICLES PARKED IN BUILDING.) Can we use our standard PEMB Drift, Horizontal and Vertical deflection limits in lieu of those specified?

RESPONSE: Refer to clarifications to design loads above.

QUESTION: Is the F. F. elevation 730.80 or 730 as shown on S-1? RESPONSE: **Revise** elevation on S-1 to be **730.80**.

QUESTION: Is the concrete apron included in Alternate #2? RESPONSE: Yes.

QUESTION: Is the two feet of dirt removed from the existing grass grade or measured after the grass & topsoil are removed?

RESPONSE: The site is sloped. Remove and stockpile topsoil (6") then proceed with placement and compaction requirements per Spec 312000, Section 3.3 Excavation for Structures.

QUESTION: Is earthwork for alternate #2 included in this alternate. The specs say it is included in base bid. Plans say it is not. There is no earth work in base bid. Alternate three says ALL earthwork is in alternate #3.

RESPONSE: **Revise** Spec 012300, 3.1, B to state "1. Install concrete paving and sidewalk as noted on drawings. No earthwork is included in this alternate."

Drawing Sheet A-1, General Notes 3: Delete "Unless Alternate 3 is accepted."

QUESTION: What is the width of the walk between the two buildings? I see the 5' but not the other measurement.

RESPONSE: Concrete walk between buildings is 5'x5'.

QUESTION: The AMENDED topsoil seems to be more than needed for this project. Do we AMEND topsoil according to the specs?

RESPONSE: Do not amend soil. Replace topsoil removed and stockpiled during earthwork. This is only included in Alternate 3.

QUESTION: Are we to include sod in this project? If so where and how much? RESPONSE: Sod is required in Spec Division 329200, Turf and Grasses. Install at all areas disturbed by grading. This is only included in Alternate 3.

QUESTION: I would like a clarification of the alternates. Alternate #2 states that base bid includes the preparation of grading for the concrete paving and sidewalk unless alternate #3 is accepted. Alternate #3 is for all earthwork for the site including the building pad. How can the base bid include the site work for the concrete paving and sidewalk but also be Alternate #3? RESPONSE: **Revise** Spec 012300, 3.1, B to state "1. Install concrete paving and sidewalk as noted on drawings. No earthwork is included in this alternate."

Drawing Sheet A-1, General Notes 3: Delete "Unless Alternate 3 is accepted."

QUESTION: I need some guidance on the bid form. Is the dollar amount requested the same as our bid, or is it the bid bond amount? If it is our bid, is it base bid or total bid? One of the alternates is a deduct. So if this represents total bid, it should probably be the base bid plus the additive alternates. This would give the highest potential amount.

RESPONSE: The dollar amount to be entered on Page 1 of the Construction – Bid Form (Item 7) is the base bid amount. Bid pricing for the requested alternates should be entered on Page 3 of the Construction – Bid Form. The amount of your Bid Bond should be for 5% of your total bid, which would include the base bid + all alternates (both add and deduct alternates).

QUESTION: Requesting a surety signature on anything other than a bid bond prior to bid opening seems really odd. However the dollar amount is determined, it will not be known until the bid is ready to turn in, which will undoubtedly be late Friday afternoon. I would have to go racing over to the surety's office, owner in tow (because the notary would need to witness his signature too) just before the bid is due. Can you re-think this form or tell me how I am supposed to make this happen and still get the bid turned in on time?

RESPONSE: We are unable to waive the notarial signature requirement on the Construction – Bid Form as this form requires attestation that the Bidder is submitting this offer to Tulsa County and will be legally bound by the offer if so awarded.
